

Pharmaceutical
Company

Solopharm

We care for people

ver. 7.2 from 11.09.2026

 SOLOPHARM

S

Solopharm mission and values

To create modern, high-quality and affordable pharmaceuticals to preserve people's health and quality of life

High-quality

We strive for the highest quality in all aspects of our work: production, management, partnership

Caring for people

People are the key value of the company: consumers, employees, partners, investors

Sustainability

Rational use of resources allows us to maintain affordable prices and provide the maximum number of people with a quality treatment

A detailed view of a pharmaceutical manufacturing plant. The scene is dominated by complex stainless steel machinery, including rollers, guides, and structural frames. Large glass safety enclosures are visible, with a yellow triangular warning sign on one of the panels. In the background, a large circular opening, possibly for a cleanroom entry or material transfer, is visible. The overall atmosphere is clean, industrial, and high-tech.

S

Solopharm
today

S

History of the company

2011 - 2013

- Liquid Plant foundation and construction

2014 - 2019

- Launch of the 1st stage. Production of the first batch of infusion solutions
- Launch of the 2nd stage. Production of ophthalmic and nasal products
- Launch of the 3rd stage of the plant — 10 new lines
- MDI aerosol line was launched

2020

- Start of construction of a new plant for solid dosage forms manufacturing

2021

- Launch of the biotechnological developments' laboratory and pilot scale site

- Launch of the 1st stage of the food supplements production (stick packs)

2022

- Launch of the solid dosage forms plant

2023

- Launch of the 4th stage of the liquid dosage form plant. Increasing the manufacturing facilities
- Launch of Matrix Wall — design and manufacture of clean rooms
- Launch of the 2nd stage of the food supplements plant (capsules)
- The groundbreaking of BioMix Plant — a plant for the production of biotechnology products

2024

- Launch of the ESS pharmaceutical warehouse
- Launch of the production line for dietary supplements in sachet packets
- Launch of a new plant for soft dosage forms manufacturing

2025

- Launch of the 2nd microbiological laboratory for quality control of solid dosage forms, soft dosage forms and dietary supplements plants
- Launch of the first site in Russia with two automated lines: for the crosslinking of hyaluronic acid and the bottling of drugs

2026

- Launch of Bellarti® fillers for commercial availability

plant**

S

Solopharm Liquid Plant

The largest manufacturer of liquid
dosage forms in Russia

>190

medicines under production

28

production lines with high
automation level

240 mln

product units
per year

Innovative dosage forms

help maintain the sterility of the products,
guaranteeing high-quality and safety
for the consumer

S

Solopharm Liquid Plant

V

Liquid Plant has been built in accordance
with the GMP standards

21 500 m²

total floor area of the plant

8 248 m²

clean room floor area

1 100 000 l/day

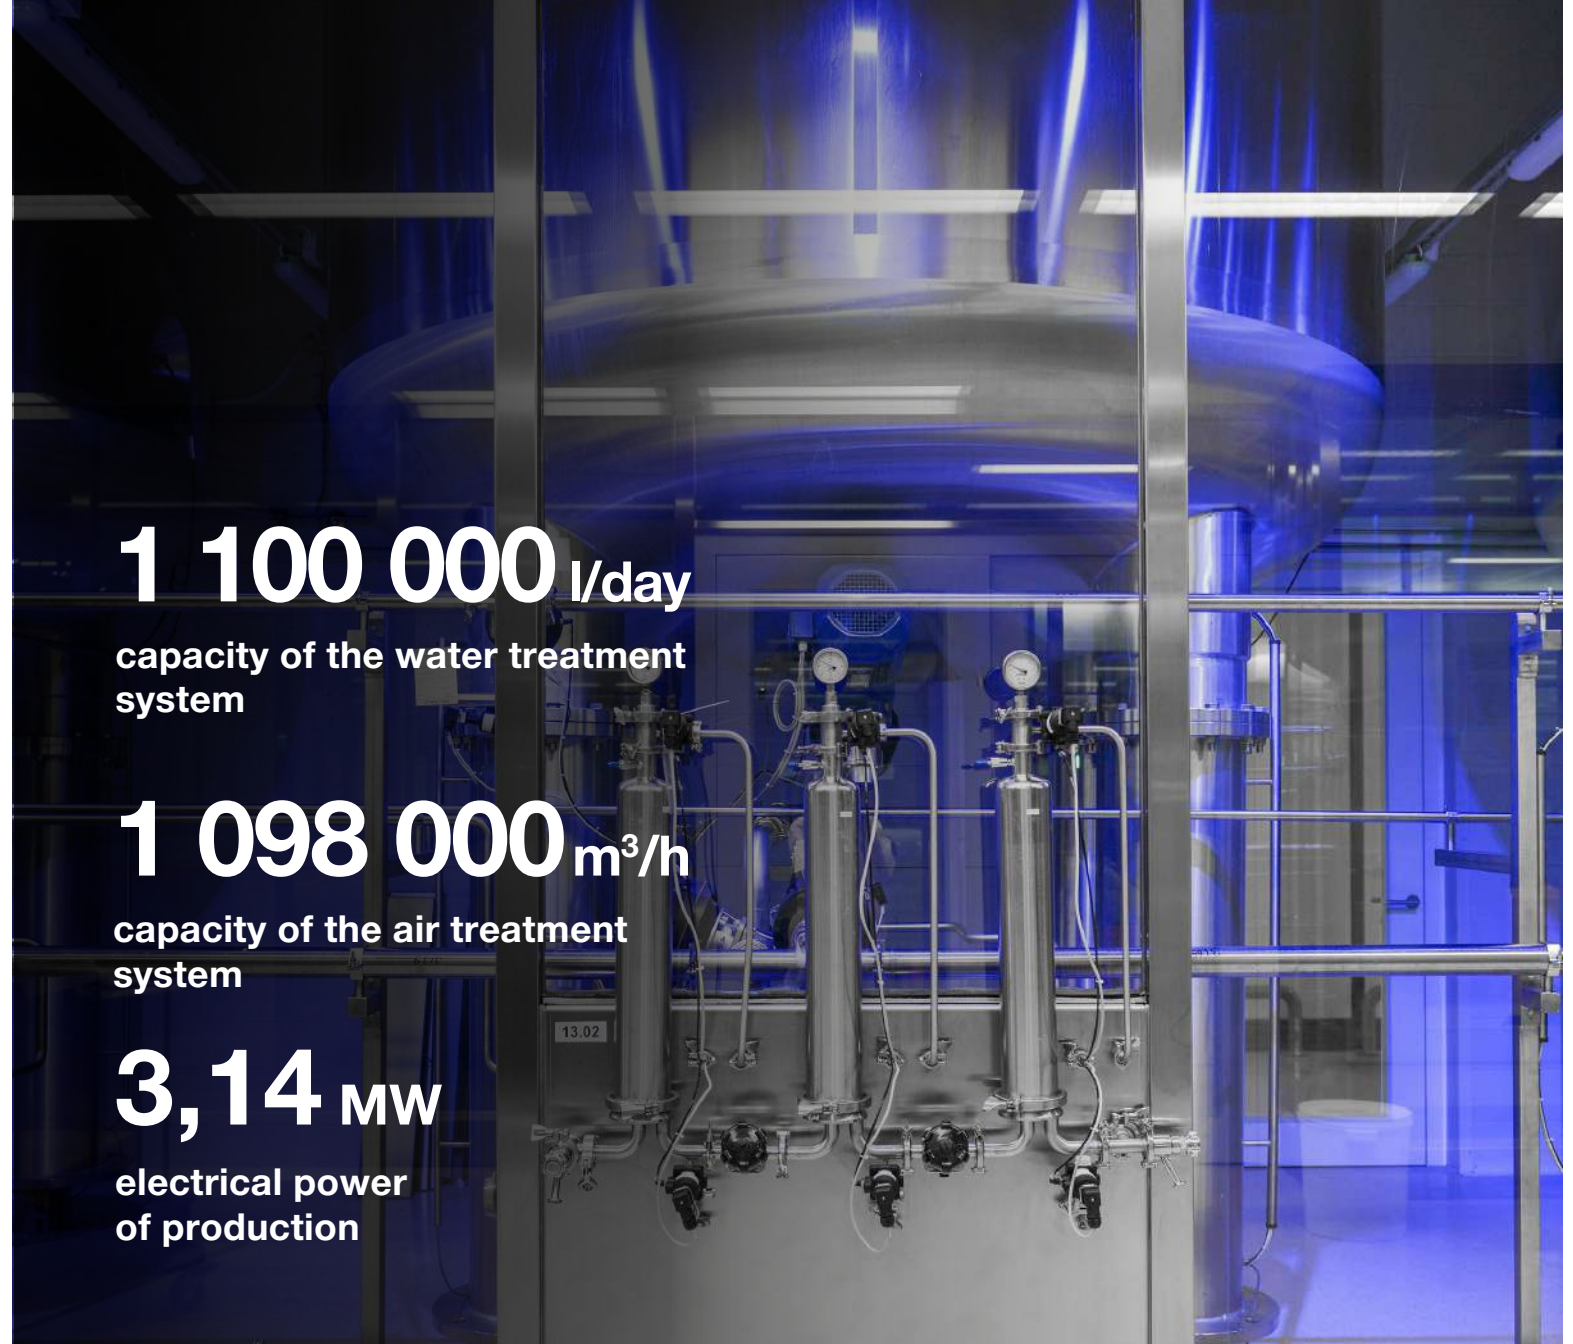

capacity of the water treatment
system

1 098 000 m³/h

capacity of the air treatment
system

3,14 MW

electrical power
of production

Innovative release forms and technologies

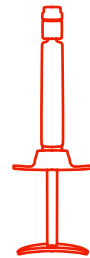

Help maintain the sterility of medicines, ensuring high quality and safety

Release forms

- BFS infusion bottles
- BFS injection ampoules
- CBP injection ampoules
- BFS unidoses
- metered drops and sprays
- multidose bottles
- OSD bottles
- BOV aerosols
- MDI aerosols
- pre-filled syringes
- etc.

Pre-filled syringes

Ready-to-use drug

Reinforced syringe stem and reinforced stop for comfortable use

BOV technology [Bag-On-Valve]

The drug is in a sealed bag inside an aerosol can

Sprays continuously and works at any angle

OSD bottle [Ophthalmic Squeeze Dispenser]

Two systems of air filtration

Guarantees sterility of the product without the use of preservatives even after opening

Innovative release forms and technologies

Preservative-free metered sprays

Unique nozzle
technology

Precise dosing
and wide geometry
of spraying

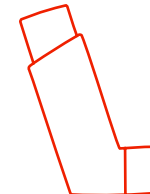

BFS technology [Blow-Fill-Seal]

Polymer
ampoules

Ease of storage
and transportation,
noninvasiveness
usage

MDI technology [Metered Dose Inhaler]

Metered aerosol
for inhalation

Rapid drug delivery to the
respiratory system organs

Food Supplement

NUTRISTICK

[Liquid Magnesium in sachets]

- > starts working within 15–30 minutes

Food Supplement

COLLAGEN ULTRA

[For beauty and healthy joints]

- > 5.7 g of marine collagen tripeptide
- > 1 scoop = effective daily dose

Cosmetology

BELLARTI® FILLERS

[Stabilized hyaluronic acid]

- + > Correction of superficial to moderate wrinkles and dermal folds
- > Volumization and contouring
- > Lip augmentation

CONTOUR
OF PERFECTION

Solution for intravenous and subcutaneous administration

ALTUMVEN®

[dalteparin sodium]

- + > Treatment of acute deep vein thrombosis (DVT) and pulmonary embolism (PE)¹
- > Prevention of thromboembolism in surgical interventions¹
- > Unstable angina or non-ST elevation myocardial infarction (NSTEMI)¹ and others

1. Marketing Authorization No. LP-N=(010110)-(RG-RU), dated 13.05.2025

Nasal product

XYLOKT® SENS

[xylometazoline + dexpanthenol]

- + > Starts working within 2 minutes
- > Pronounced effect lasts up to 12 hours
- > Two dosage strengths for patients of different ages
- > Contains dexpanthenol to support nasal mucosal recovery

Patient Information Leaflet for Xyloct® Sens, Marketing Authorization No. (002068)-(RG-RU))

Moisturizing Eye Drops

BIVIART® INTENSIVE

[sodium hyaluronate 0.18%, dexpanthe-nol 5%,
chondroitin sulfate 0.07%]

> Indications for Use¹:

- relief of symptoms of DES
- use after surgeries and ocular injuries
- use during contact lens wear

> Provides triple action²⁻⁴:

- sodium hyaluronate — hydration of the ocular surface
- dexpanthenol — promotes healing of damaged tissues
- chondroitin sulfate — helps reduce cicatricial (scar) tissue changes

DES — Dry Eye Syndrome

S

SoloScience

New online project for young psychiatrists and neurologists

About the project

The online project for psychiatrists and neurologists based on Solopharm is designed as an educational and information platform for the exchange of experience of practicing or beginning their path of young doctors

Project goal

Creating a community of young psychiatrists and neurologists who will be able to gain new knowledge in their field and learn from the experience of our distinguished speakers

Two formats

> **Podcasts with speakers,** with opportunities to discuss relevant questions

> **Online webinars featuring** clinical case reviews

More information on the
SoloScience website →

How SoloScience benefits doctors

1. Expands clinical thinking through solving non-standard practical cases linked to theoretical knowledge
2. Provides access to the most up-to-date information in psychiatry and psychoneurology
3. Offers opportunities to discuss relevant questions with opinion leaders in psychiatry and psychoneurology
